

Delivering software solutions with a collaborative, social approach. Focused on automation, tools, infrastructure, and AI. Educated in software engineering with experience in languages such as C++, Java, and Python, and tools including AWS, and Docker. *Open to relocation.*

Experience

Digital Technology Generalist
BitSpace

- Lead development on a multiplayer, mixed reality game on a fixed deadline using Unity with C#
- Held responsibility for organizational standards such as version control and asset intake
- Served as a digital subject matter expert on a cross-discipline team incorporating physical crafts and stakeholder management

March 2025 – Present
Chicago, Illinois

Advisor
Warby Parker

- Achieved the #1 feedback rating across the Central North region, with an exceptionally high response rate

September 2024 – May 2025
Skokie, Illinois

Software Engineer – Pipeline & Tools
Electronic Arts (EA Create Animation)
Titles: *EA SPORTS PGA TOUR (2023), Dragon Age: The Veilguard (2024)*

- Built tools to improve the workflows of users and decrease iteration time
- Collaborated with artists and engineers to determine user requirements for each scenario
- Leveraged subject-matter expertise of tools and partners to drive project plans and work items
- Automated Python Maya animation export scripts, alleviating 9 person-days of manual work
- Sought out new knowledge, tools, and solutions to improve the reliability and efficiency of the team

January 2022 – January 2023
Orlando, Florida (Remote)

Independent Software Engineer

- Developed a full-stack web news search site consisting of a Java ETL tool on AWS EC2, a Java REST API app using AWS Elastic Beanstalk, and a React.js front end served via AWS S3

March 2020 – Present

Software Engineer (Part-time)
Northwestern University Media and Design Studio

- Transferred 1,500 documents with 5,000 individual assets from PostgreSQL to IIIF via Python
- Synced WebCheckout user data for >6,000 patrons with cron-automated Python scripts

June 2017 – March 2020
Evanston, Illinois

Skills

<i>Technical Concepts:</i> • APIs • Scalable Cloud Architecture • Tools and Automation • Object-Oriented Programming • Agile Development	<i>Programming Languages:</i> • C++ • Java • Python • React • PowerShell, Bash, Ruby	<i>Key Software:</i> • Cloud platforms (AWS) • Relational Databases (SQL) • Containers (Docker) • AI Tools • CI/CD Tools (Jenkins)
